NetWork
CPU accessories and stand-at desk.

CPU–grid for attachment of further hanging shelves to the table side. Powder-coated steel rod. The grid is secured in the functional gap between table top and frame.

CPU–holder for attachment of the CPU to the table side.
L-shaped grid of powder-coated steel rod. The holder is inserted into the functional gap between table top and frame.
Further shelves can be hung onto it. The CPU is secured with a strap and quick-release fastener.

Hanging shelves are of melamine-resin laminated LIGNOpal chipboard with glued-on (KU) plastic edges and rounded corners. Fitted with a bracket of arctic-colored powder-coated steel rod for hanging onto the CPU-holder and CPU-grid, for the upper and lower positions.

Stand–at desk for insertion into the functional gap between table top and frame. With a swivelable post of powder-coated steel tube as well as a working surface of melamine-resin laminated LIGNOpal chipboard.

The following material groups are available to choose from: Frame made of steel tube: M(arctic); Top made of LIGNOpal-plastic: L(black).
