
Chipboard:
L018 anthracite.

Top surfaces. School table tops of **LIGNOdur** are exceptionally robust. They are made entirely from the sawdust and shavings left over from solid-wood processing and do not need any additional synthetic resin. The moulded top with rounded edges is coated with melamine resin. For the production of tables and panels for the bodies of clad furniture such as cupboards and filing cabinets, **three-layer quality fine chipboard** E1 (DIN EN 312) is used. The panels are laminated on both sides with melamine resin.
Important note. Material and colour charts produced by printing can deviate slightly from the original and the colours are not necessarily exactly true. The same applies to ink-jet or laser prints from PDF files.
