

**MATERIAL NOTES** Rein-Glas\_MF\_EN - 18.05.2020 - [www.vs-furniture.com](http://www.vs-furniture.com)

## **Cleaning and maintaining glass surfaces.**

**Note on COVID-19:** Despite the COVID pandemic, the Robert-Koch Institute (RKI) does not recommend the routine disinfection of surfaces in domestic and public areas, including that of frequent contact surfaces. Appropriate cleaning is the preferred approach.

**General information:** In general, glass surfaces do not require intensive cleaning. Simply wipe away any slightly soiled areas with a moderately moistened cloth or sponge. Eliminate any dirtier areas with water and a commercially available glass cleaner.

**Do not use any aggressive and/or abrasive cleaning materials** since these can damage the glass surface. These also include all liquid cleaners which contain abrasive additives such as whitening or similar.

**Only use cleaning cloths or rags or natural or synthetic sponges** for cleaning. Do not use any synthetic or steel wool cleaning pads. These can permanently damage the surface structure. After cleaning, wipe moisture off the glass surfaces with a rubber squeegee and then wipe with a dry cloth.

Use suitable mechanical aids (e.g. scraper) to loosen any **difficult-to-remove or adhering dirt** such as splashes of paint before cleaning. In such cases, you are advised to contact the VS Service department directly.
